

## New User Access

*The term “new user” refers to an individual who does not currently have access to the Central Accounting Reporting System (CARS) application.*

New users are required to logon via their PIV/CAC credentials or choose the 3<sup>rd</sup> party credential service provider, ID.me

**Note:** Users choosing 3<sup>rd</sup> party CSP’s who have existing personal accounts with ID.me must access their ID.me account and add their work email address to their profile.

1. Access SailPoint IIQ, <https://iiq.fiscal.treasury.gov>, to create your identity.

 An official website of the United States government [Here's how you know](#) ▼

 PIV / CAC

**ID.me**

### Authenticate using PIV, PIV-I, CAC, Yubikey

Certificate Authentication enables U.S. Federal employees and contractors to authenticate using a federally provided credential (PIV, PIV-I, CAC, Yubikey)

- 
2. You will be prompted to enter your email address. **You must use your work email address. Click Submit**

# Setting Up A Manager

## 1. Log into SailPoint

## 2. Click on the “Hamburger” Icon on the top left of the screen

3. Select **Manage Identity**

4. Select **Modify Manager**

5. Select **Set/Modify the Manager for your Account**, then press **Next**

6. If a name and email of a manager appear, then you already have a manager set in SailPoint. You can proceed to the next selection. If your page looks like the below example, continue to Step 7.

This screenshot shows the "Set Manager Option List" form in the SailPoint Development Environment. The form has a header with the SailPoint logo and "Development Environment". Below the header is a navigation bar with "Home" and "My Work" links. The main content area is titled "Form" and contains the "Set Manager Option List" form. The form has a section titled "Instructions" with the text "Please select one option from the list below. If you wish to leave, please hit the Cancel button." Below this is a section titled "Current Manager" with two radio button options: "Current Manager" and "No Valid Manager Set". The "Current Manager" option is selected. Below this is a section titled "Set Manager Option List" with a text input field for "Manager's Email Address \*". At the bottom of the form are "Cancel" and "Next" buttons. A red box highlights the "Current Manager" section.

7. Enter your manager's work email address and press **Next**

This screenshot shows the "Set Manager Option List" form in the SailPoint Development Environment, similar to the previous one. The "Current Manager" section is still selected. In the "Set Manager Option List" section, the "Manager's Email Address \*" field now contains the text "Chen Prosacco@cairetest.gov". At the bottom right of the form, the "Next" button is highlighted with a red box. A red box also highlights the "Set Manager Option List" section.

## 8. Review the information, then **Submit** the request

Form

Confirm Selected Manager

**Instructions**

Please confirm the manager email selected below.  
If you wish to change the manager selected, please hit the Back button.  
If you wish to leave, please hit the Cancel button.  
Otherwise, hit Submit and your request will be submitted.  
Please note, that the manager will need to approve the action before they are assigned; therefore, there may be a delay before the manager appears on your identity.

**Selected Manager**

Selected Manager  
Chan.Prosacco@caltest.gov

Cancel Back **Submit**

## 9. Communicate to your manager that you are needing them to approve the relationship in SailPoint

## Determining Your Agency's AGroup

In order to find the appropriate AGroup:

- Ask your manager
- If you already have access to other modules within CARS, perform the tasks below
- If you do not have access to CARS modules yet, ask a peer to perform the tasks below
- If you still do not have access, call TSC for assistance at 1-877-440-9476

## 1. Log into SailPoint

8. Review the request, then press **Submit**

This screenshot shows the 'Manage My Access' page in the SailPoint interface. The page has a dark blue header with the SailPoint logo and 'Development Environment'. Below the header, there's a navigation bar with 'Home' and 'My Work'. The main content area is titled 'Manage My Access' and has a 'Help' button. It features two main steps: '1 Manage My Access' (Select access you would like to add or remove) and '2 Review and Submit' (Look over your selections and confirm). Under step 1, there's a section 'Add Access' with a green plus icon. Below this, a table lists access items. One item is visible: 'CARS-ACCTSTMT\_AR\_10613' with a role of 'ACCTSTMT Agency Reviewer' and an owner of 'AppfSSO-CARS'. At the bottom of the page, there are three buttons: 'Previous', 'Cancel', and 'Submit'. The 'Submit' button is highlighted with a red rectangle.

## Appendix A.

# CARS External Modules and Roles

CARS supports the Fiscal Service strategic goal to produce accurate, accessible, and timely governmentwide financial information and reports while reducing reconciliation burdens on FPAs.

### **Account Statement (ACCTSTMT):**

Account Statement provides federal agencies with a central location for retrieving information to assist with their financial reconciliation processes. Account Statement is designed for agencies that perform their Fund Balance with Treasury (FBWT) reconciliation based on TAS. This module has screens for ALC summary, ALC activity, and ALC transactions.

#### **Role:**

- Agency Reviewer (AR) – can view all CARS posted transactions that relate to the user's AGroup

### **Appropriation Warrants- (APROP):**

This component of the Agency Transaction Module provides the capability to electronically create warrant transactions for each Federal Program Agency (FPA) based on a US Code, Statue, or Public Law. FPAs are able to view approved warrants based on their profiles.

#### **Role:**

- Agency Reviewer (AR) – can view all posted Appropriation that relates to the user's AGroup

### **Agency Standard Reporting (ASR):**

Agency Standard Reporting (ASR) provides UI for ASR users to access all of the standard "pre-canned" reports that are available for execution, the capability to schedule reports to be executed and stored in the WebFOCUS Report Library for later retrieval, transparent access to the BI Dashboard, InfoAssist features of the WebFOCUS Managed Reporting (MR) client, and designation of ad-hoc reports generated in InfoAssist as new standard reports

#### **Roles:**

- Agency Account Administrator (AAA) – can view ASR report and Notify Agencies of Account Exceptions in CARS that relates to the user's AGroup
- Agency Reviewer (AR) – can view ASR report in CARS that relates to the user's AGroup

### **Borrowing (BORR):**

This component of the Agency Transaction Module provides an on-line process for creating, approving and reviewing Borrowings and Repayments transactions from Treasury.

#### **Roles:**

- Agency All (AA) – can create, update, delete, view pending, view posted, as well as certify or reject Borrowing transactions that relates to the user's AGroup
- Agency Certifier (AC) – can view pending and posted as well as certify or reject Borrowing transactions that relates to the user's AGroup
- Agency Preparer (AP) – can create, save, edit, delete and view both pending and posted Borrowing transactions that relates to the user's AGroup
- Agency Reviewer (AR) – can view pending and posted Borrowing transactions that relates to the user's AGroup

### **Checks Issued Audit (CIA):**

The CIA reports compare Agency checks issued data and Source System checks issued data. Agency checks issued is defined as data reported by Agency users. Source System checks issued is defined as data provided by source system files. The CIA module should only be utilized by disbursing officers, i.e., agencies with the authority to disburse payments.

#### **Role:**

- Agency Viewer (AV) – can view CIA reports for the Agency's ALC(s)

### **Classification Transaction and Accountability (CTA):**

This component of the Agency Transaction Module generates the FS 224 Statement of Transactions used to report monthly accounting activity by FPAs who rely upon Treasury to disburse funds. FS 224 monthly reports serve as the basis for Treasury's reporting of federal revenues and expenditures for these FPAs. The FS 224 allows monthly reconciliation of disbursements and collections for each Agency Location Code (ALC). This in turn, enables the Funds Balance with Treasury (FBWT) to be reconciled to the General Ledger by Treasury Account Symbol (TAS). The FS 224 consists of three parts: Section 1 is Fund and Receipt Accounts. This is where appropriated funds are classified and reclassified into FPA accounts. Section 2 is for reporting Payments, and Section 3 is for reporting Collections.

#### **Roles:**

- Agency All (AA) – can create, update, delete, view pending, view posted, as well as certify or reject CTA transactions that relates to the user's AGroup
- Agency Certifier (AC) – can view pending and posted as well as certify or reject CTA transactions that relates to the user's AGroup
- Agency Preparer (AP) – can create, update, delete and view both pending and posted CTA transactions that relates to the user's AGroup

- Agency Reviewer (AR) – can view pending and posted CTA transactions for users with the same AGroup

### **Non-Expenditure Transfers (NET):**

This component of the Agency Transaction Module provides an on-line process for creating, approving and reviewing the transfer of funds between or within Government Agencies without recording a receipt or an expenditure (outlay) on the books on the Treasury. Non-expenditure Transfer Authority transactions do not appear in Treasury reports or in the budget document as receipts or expenditures because these transactions do not affect the budget surplus or deficit.

#### **Roles:**

- Agency All (AA) – can create, update, delete, view pending, view posted, as well as certify or reject Non-Expenditure Transfers that relates to the user's AGroup
- Agency Certifier (AC) – can view pending and posted as well as certify or reject Non-Expenditure Transfers that relates to the user's AGroup
- Agency Preparer (AP) – can create, update, delete and view both pending and posted Non-Expenditure Transfers that relates to the user's AGroup
- Agency Reviewer (AR) – can view pending and posted Non-Expenditure Transfers that relates to the user's AGroup

### **Statement of Difference (SOD):**

Agencies must ensure that none of their ALCs have out of balance conditions on their Statement of Difference reports before they can become full reporters. The SOD reports compare the Agency Balance and the Source System Balance. The Agency Balance is defined as data reported by agency users. The Source System Balance is defined as data provided by source system. Access to SOD will provide two separate reports for tickets (Collections Information Repository or CIR) and debit vouchers (Payment Information Repository or PIR)

#### **Role:**

- Agency Viewer (AV) – can view all posted transactions in CARS that relates to the user's AGroup

### **TDO Payments (TDOPAYMENTS):**

This component of Account statement provides agencies with Regional Financial Center payment information.

#### **Role:**

- Agency Viewer (AV) – can query ALC reports for Treasury Disbursing Office ACH, EFT and check payments

### **Transfer and Non-Cash (TANC):**

This component of the Agency Transaction Module should be used for the following:

- IntraALC Transfer: an accounting cash event of transferring funds that are internal to the agency and within the same ALC, that is not associated with a payment or collection. IntraALC transfers are indirectly related to source transactions. These transactions should not be corrections to source system transactions.
- InterALC Transfer: an accounting cash event of transferring funds from one ALC to another ALC, either in the same agency or a different agency, that are not associated with a payment or collection. InterALC transfers are indirectly related to source transactions. These transactions should not be corrections to source system transactions.
- Transfers have 2 parts, (1) transfers to and (2) transfers from.
- Non-Cash: an accounting non-cash event that is not related to cash held in the Treasury General Account (TGA), but is needed for Treasury reporting, i.e. Monthly Treasury Statement (MTS) reporting. For example, Federal Debt's accruals and amortization transactions are reported on the MTS in the current accounting period, but the related cash payment takes place in a future accounting period.
- Subsidy Transfers: when a direct loan or guaranteed loan is disbursed, executes a positive subsidy modification, or has an upward re-estimate, the program account pays a subsidy to the financing account. Examples include: post-1991 direct loans, upward re-estimates and interest on the re-estimates, or modifications of any direct loans.

### **Roles:**

- Agency All (AA) – can create, update, certify, reject, delete, reverse and view pending and posted TaNC transactions that relates to the user's AGroup; can act as Agency Recipient Certifier to approve InterALC transactions that relates to the user's AGroup.
- Agency Certifier (AC) – can certify, reject and view pending and posted TaNC transactions that relates to the user's AGroup; can act as Agency Recipient Certifier to approve InterALC transactions that relates to the user's AGroup.
- Agency Preparer (AP) – can create, update, finish, delete, reverse and view pending and posted TaNC transactions that relates to the user's AGroup.
- Agency Recipient Certifier (ARC) – can reject and approve InterALC transactions and view pending and posted TaNC transactions that relates to the user's AGroup.
- Agency Reviewer (AR) – can view pending and posted TaNC transactions that relates to the user's AGroup.

**\*\*More information is located:** <https://www.fiscal.treasury.gov/cars/cars-transactions-accountability.html>

### **Warrant Journal Vouchers (WJV):**

This component of the Agency Transaction Module is used to report the estimated amounts of Taxes and Customs duties determined by the Office of Tax Analysis and to report adjustments, as a result of actual amounts that are collected by the Internal Revenue Service and U.S. Customs Service. The Excise Taxes and Customs duties are transferred to the Trust Fund Receipts and invested by the Bureau of the Fiscal Service in Government Securities as legislated.

**Role:**

- Agency Reviewer (AR) – can view posted Warrant Journal Vouchers that relates to the user's AGroup

**Year End Closing (YEC):**

This component of the Agency Transaction Module facilitates the process of the cancellation of the 5<sup>th</sup> year expired accounts and for the Indefinite, Year End Closing Adjustment currently based on FACTSII FMS Form 2108

**Roles:**

- Agency Preparer (AP) – can create, update, delete, agency certify and view both pending and posted Year End Closing Adjustment that relates to the user's AGroup
- Agency Reviewer (AR) – can view posted Year End Closing Adjustment that relates to the user's AGroup

**AGroup Module Triplet Acronym Quick Reference Guide.**
