

IPAC SailPoint Identity IIQ “AppApprover” Form

As a result of the IPAC migration to CAIA (multifactor authentication), the existing IPAC agency “Master Administrators” and “Agency Administrators” for each ALC were imported to the new CAIA- SailPoint “AppApprover” ALC group(s).

The CAIA-SailPoint “AppApprover” ALC group members are the final authorized approvers for all agency user role requests for the agency ALC. The first access approver is the user’s “Manager” assigned in SailPoint. The “AppApprover” groups replaced the former “Master Administrator” and “Agency Administrator” roles in ISIM.

After a user submits their access requests in SailPoint IIQ, the user’s “Manager” (1st approver) will receive an email to approve the access request. Once approved, a second email is sent to the “AppApprover” (2nd approval) group members to approve the access request. User’s Manager (1st Approver) and SailPoint AppApprover (2nd Approver) cannot be the same person. Once both approvals are complete, the user will be able to access the application and role-based functions requested for the specific ALC/PON(s).

This form is completed for the following requests.

1. User to be added to the agency “AppApprover” group for the ALC/PON listed below and signed by an active agency SailPoint “AppApprover” group member.
2. User to be removed from the “AppApprover” group. No “AppApprover” signature is required.
